CAPTURAS VAGRANT

```
Windows PowerShell
                                                                                                                                                                 X
     default: SSH username: vagrant
     default: SSH auth method: private key
     default:
     default: Vagrant insecure key detected. Vagrant will automatically replace
     default: this with a newly generated keypair for better security.
     default:
     default: Inserting generated public key within guest...
default: Removing insecure key from the guest if it's present...
 default: Key inserted! Disconnecting and reconnecting using new SSH key...
=> default: Machine booted and ready!
 --> default: Checking for guest additions in VM...

default: No guest additions were detected on the base box for this VM! Guest
     default: additions are required for forwarded ports, shared folders, host only default: networking, and more. If SSH fails on this machine, please install
     default: the guest additions and repackage the box to continue.
     default:
 default: This is not an error message; everything may continue to work properly,
   default: in which case you may ignore this message.
=> default: Rsyncing folder: /cygdrive/c/Users/mikes/vagrant-iniciacion2/ => /vagrant
PS C:\Users\mikes\vagrant-iniciacion2>
